

The Four Spheres of the Earth

Name: _____ Date: _____

Part A — Label the diagram. Use the word bank to identify each of the four spheres.

Word bank: Atmosphere • Hydrosphere • Biosphere • Geosphere

Part B — Complete the description of each sphere.

1. Atmosphere The layer of _____ that surrounds the Earth. It is made mostly of nitrogen and oxygen, and it traps heat and blocks harmful _____ from the Sun.	2. Hydrosphere All of the _____ on Earth, in liquid, solid (ice) and gas (water vapour) form. It covers about _____ of the Earth's surface.
3. Biosphere All _____ things on Earth — plants, animals, fungi and bacteria — plus the parts of the other three spheres they need to _____ in.	4. Geosphere The _____ part of the Earth — rock, soil and sediment — from the _____ down to the core.

Part C — Think about it

Choose **one** of these events: rain falling into a river • a plant's roots cracking a rock • a volcano releasing gas into the air.

In 2–3 sentences, name the spheres involved and explain how they are interacting.
